The first project I worked as project manager is a new product for insurance application. My responsibility is firstly discussing with customers and collecting user requirements, accessing feasibility; and then work with designer, architect to produce the prototype and IT landscape, confirm with customer about project scope; thirdly evaluate efforts with developers to implement and testing, monitoring the processes and controlling some urgent needed changes, at last release the product and technical documents to customers.

### Description

The project is about redesigning a product with implementing new UX and landscape. As project manager, firstly I communicated with interested parties to evaluate the project and confirm some main use cases needed to be covered; then made a schedule accordingly, held kick-off meeting with interested parties and project members. Thirdly executed tasks in project management plan with acquired resources; monitoring and recorded the status of process, controlling risks, quality and cost. At last, held realization meeting for released project.
